

Britannica SmartMath

NEW!

Maths Practice, Differentiation, and Progress Tracking Made Easy!

With *SmartMath*, students significantly improve their maths skills and test scores. Students spend more time on tasks because they are working at their own level and having fun along the way!

Fun and Engaging

A game-like interface and reward systems motivate students to learn maths.

Individualised and Self-Paced

Question difficulty adjusts with each student response, for real-time differentiation. Suggestions for remediation are provided as needed. With *SmartMath*, students progress at their own pace.

Supplement Your Maths Curriculum

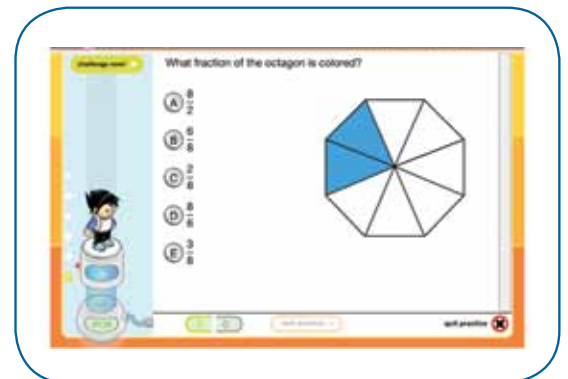

SmartMath's maths practice is correlated to Australian and New Zealand standards, making it easy to assign maths practice to students.

Instant, In-depth Reporting

SmartMath automatically tracks student progress, identifies trouble spots, and assesses standards preparedness for quick, data-driven instructional decisions.

Students earn stars, bonus points, badges, and most importantly confidence for successfully answering and completing *SmartMath* practice.

Visual aids help students understand concepts and improve math literacy as they practice.

A study guide is always ready to help students who need it.

Call today for a demonstration and free trial access.

SMARTMATH CAN BE USED FOR:

Skill Reinforcement • Test Preparation • Intervention • Remediation • Enrichment

“The students performed significantly better on a math post-test after using the Britannica **SmartMath** system.”
John B. Watson, Ph.D. and the staff of Watson Education

Tips for Students to Help Them Reach Their Goals

Helpful reminders guide students to their next steps within *SmartMath* and to new practice sessions. This direction is perfect for encouraging daily student activity.

Extra Activities to Encourage Students

Students will see a “to-do” list of other fun activities within the site that promote learning.

Remediation Alerts

Remediation alerts that contain recommended assignments for students enable teachers to quickly and easily respond to those who need help.

Text-to-Speech Feature

Students have the option of having each question read aloud to them.

Quick access to exportable and printable reports that cover all aspects of student progress.

NUMBER AND OPERATIONS

MEASUREMENT

GEOMETRY

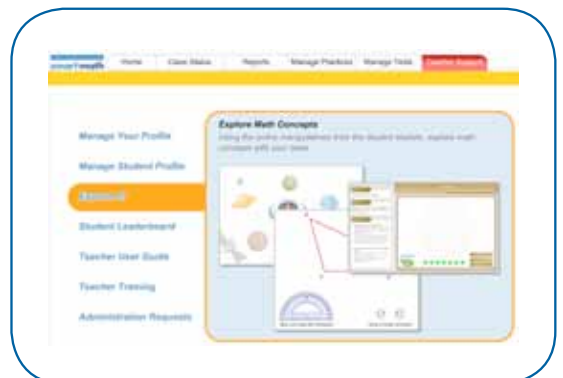

DATA ANALYSIS AND PROBABILITY

ALGEBRA

Covering 91 topics which include learning objectives in any maths curriculum.
